Instructions: Use the Average (Avg) Value Column as a guideline. These values are based upon 15-20% of an average purchase price for the items. If the price you pay for the items are more or less than the Average Value listed above, list in the Original Cost column the price you normally pay for the item. In the Actual Value column, calculate the donation value at 15-20% of the Original Cost. Extend the Actual or Average Value by the Quantity donated to calculate the Total Value of the items contributed

Call and set an appointment prior to January 15th and Receive a 20% discount on professional fees
